Tree Extension Code Merge Browser Support - 6.2/6.3, etc.
 	
• Scott to show local browser tests.
• Kim and Jason to provide update.
	LEXEVS-913 - Jira project doesn't exist or you don't have permission to view it.
	
	• Requirements assumed by Mayo:
	  ◦ Remote client should be compatible with 6.0, 6.1, 6.2 (we tested with our remote client build/tests) against LexEVS 6.3 successfully.
	  ◦ Terms browser 2.6 should run with LexEVS 6.3.
	  ▪ This works by replacing the 6.2 lexbig jar within the browser war folder with the lexbig jar from 6.3.
	
	Kim suggested that the requirement was to not make any modifications to the term 2.6 browser client (can't replace any jar(s)).
	
	Scott suggested that the 2.6 term browser can run without any changes when LexEVS 6.3 is deployed.
	
	Larry will need to decide how to go forward -
	
	• Do we want another release of the term browser to incorporate the updated lexbig jar from 6.3?

OWL2 acceptance • Rob to provide update	LEXEVS-852 - Jira project doesn't exist or you don't have permission to view it. ◦ Rob was not present. One last thing for Rob to look at was the JSON namespace fix.
Mapping Extension Discussion • Rob to provide update	Scott was not able to reproduce the issue that Rob found on DEV Data. We will get an update next week when Rob returns.
CTS2 Doc Service - Update (ticket 175164)	They were working on some start up scripts for these services and had a question regarding them. TODO: Scott to set up a meeting to discuss this.
