Agenda

Sprint Status	Current Sprint - Sprint 5 (May 13, 2015 - June 2, 2015) LexEVS S13-500 Agile Development - Sprint Status#SprintStatus-Sprint5
Sprint 6 Planning	Upcoming Sprint - Sprint 6 (June 3, 2015 - June 24, 2015) LexEVS S13-500 Agile Development - Sprint Status#SprintStatus-Sprint6 Issue Grooming • Prioritize JIRA issues key summary type created reporter priority status labels Jira project doesn't exist or you don't have permission to view it. Prototype Results • Scott to present results	Results show an acceptable rate of performance. Some interest expressed in running the next iteration against the content loaded into LexEVS. Scott to discuss with Craig.
OBI Loader • Rob to provide status - loaded with OWL 2 loader - results?	OWL2 loader fails against OWL one. OWL2 should be able to load any OWL source. OBI has a number of namespaces in the same coding scheme. Class cast exception characterizes the exception. At least need to be investigated in next sprint. Scott to look into the exception and the possibility of providing output specific to the content item. Focus on namespaces.
MRMAP Loader • Prioritization from Larry	Rob to look into getting the SNOMED to ICDx mappings loaded after grepping out a subset with help from Brian Carlson. If this doesn't work out we may have to push this into an upcoming sprint.
6.3 Status • Update from Tin	SCM team is working on an Anthill pro track for this. Tin will update when track is created and application is deployed.
Lucene Version Update - 4.10.4 • Based on existing tooling to support our development.	Tracy to ask SIMA about use of 5.1 and what kind of tooling they are using. Scott to keep track of developments on github.

Mayo as trusted site also VPN: Jason	Jason to check with them about this. Possibility to provide laptops if needed.
Security Training	Needed by Friday. Scott to check into this.
