

calIntegrator Retirement Announcement

The calIntegrator data portal was retired on March 31st, 2015. Much of the study data currently hosted in the NCI instance of calIntegrator is also available in other data portals, including the Cancer Genome Atlas [TCGA](#) data portal. Those data that are not available elsewhere have been migrated to the Georgetown Database of Cancer [G-DOC](#) . calIntegrator data will remain available for download after calIntegrator data portal retirement via [calIntegrator Directory](#) page. While NCI will not be able to provide technical support for the calIntegrator software after the retirement, the source code is available on [Git Hub](#) and we encourage continued community development.

If you have any further questions, please contact the NCI CBIIT [Application Support](#) team.

Introduction to G-DOC document is available [here](#).
