There have been sporadic issues. • The Query will run on startup – in the first couple of minutes. If it happens after that, it is something different. • Mayo ran on dev server and completed query. Took 7 mintues/vs 12 minutes. • FDA pulling large parts of content in LexEVS and storing it local. • Would be good to get the code from Raghu so we could stress test. • Still consider options to restrict user from taking over the system performance, etc.	(Craig/Kim/Larry)
• New team member Status (Mandy, Sahana, Linda)	• Start with contacting Rob Costello.	• Craig/Mandy to contact Rob to start process.
