Agenda

- Meeting Recap

- Content Review Strategy

- Next Steps

Meeting Recap

- Group proposed starting with the OPEN Demography content to implement in Rave.

  - NRG and Theradex collect additional data along with the OPEN Demography data, however they do not modify the OPEN ALS.

  - Group agreed the scope should be limited to the OPEN Demography content since the majority of the organizations only collect the OPEN Content.

- Each organization was asked to confirm if the OPEN Demography content was meeting their scientific and organizational needs.

Content Review Strategy

- Review the OPEN elements and their attributes
  - Review the coded values from CDUS reporting and compare it with the PVs in the OPEN CDEs.

- Develop a set of recommendations to reconcile the OPEN elements with CDUS values.
  - We will need to describe in detail the reasons for the change
  - The changes will not be a barrier; they will reflect the needs of all 6 groups and will minimize manipulation of the content before reporting

National Cancer Institute

Next Steps

- Continue to provide feedback based on working group discussions on OPEN Demography content.

- Continue to capture the decision making process for the polling exercise for lessons learned; post for future review and use

Reference Information / Questions

- NCTN Co-Lead
  - Tina Taylor, Project Specialist II, American College of Radiology Imaging Network
  - ttaylor@acr.org
- NCI Co-Lead
  - Dianne Reeves, RN, MSN Associate Director, Biomedical Standards, NCIP
  - dianne.reeves@nih.gov

- Project Management Support
  - Neesha Desai, PMP, Project Manager, NCI CBIIT
