Agenda

- Meeting Recap

- Content Review Strategy

- Next Steps

Meeting Recap

- Group reviewed the existing OPEN Demography Content.
- Feedback included:
  - Include SSN
  - In Gender: Change Female Gender to Female and Male Gender to Male
  - Does not meet Theradex needs because it does not include all the fields they collect and the codes are not consistent with their backend database and CDUS reporting process.
- Proposed options for moving forward
  - CDUS accept the current OPEN Demography data
  - Change the valid values to match the CDUS Coded Values
  - Keep the content as is and modify the attributes (permissible value sets, formats, alternate questions, definitions etc.) in OPEN

Outcomes of today's meeting

- Formal consensus on starting with OPEN Demography

- Considerations/questions about the changes

- Additional information

  – Ravi (Westat) will be presenting to the NRDS Committee what impact changes to the OPEN Demography will make to the existing systems/processes/integrations.

  – The Policy and Governance group will focus on defining policies and the management of the content in Rave.

Content Review Strategy

- Review the OPEN elements and their attributes
  - Use of numeric or other codes for Permissible value sets
  - Formats (dates)
  - Acceptable alternate question text and meanings
  - Clarity of definitions
  - Scientific and research need
  - Concise value meanings
  - Naming conventions/special characters
  - Data types and field lengths
  - External Standards

Next Steps

- Continue to provide feedback based on working group discussions on OPEN Demography content.

- Continue to capture the decision making process for the polling exercise for lessons learned; post for future review and use
