Recap on OPEN Review – Neesha Desai discussed the due dates for the OPEN review

CDUS Final 1 week Review – Neesha Desai reminded everyone to review the CDUS spreadsheet.

- Tina Taylor: If you have any changes, please provide comments and examples as available.

Alternate OID Approach – Tina Taylor

- Is your group using the approach of the alternate OID approach or going with the system generated OIDs?
 - Cathy (SWOG): I will need to verify but I believe we are using alternate names
 - Kristina: We typically do not use the object cart importer, we usually build in Rave, so I will have to get more information on this.
- Dianne: First, we were able to change them, and then it became clear that using the standards also meant using the name and the question text. Now, we can change them using an alternate OID approach (an alternate Rave OID). Speaking with Medidata, we proposed using a Rave preferred alternate name and it would capture that preferred name within the standard; using this, you can use an alternate.
 - Ginger: Walk was going to verify the alternate short name will be available in the new cart schema but we have not heard back yet.
 - Dianne: I know SWOG has used alternate names quite a lot, is this something that would be of interest to you, maintaining your current names and using the Rave preferred alternate name?
 - Cathy: I think that would be helpful, but Angela would be the one to answer that.
 - Tina: It is worth reaching out to the groups; I will put together an email to send out to the groups for feedback.

OPEN Implementation Pilots – Neesha Desai

- Theradex (OPEN, Backend, Rave) and ECOG (OPEN, Rave) will be available for Piloting the OPEN implementation
