A. Technical Overview

Sprint 77 (March 1, 2018 – March 14, 2018) has been completed. In this sprint, there was work completed on iterators and tests for asserted value sets in our remote API service. The LexEVS service was updated to incorporate testing of asserted value sets. A snapshot build was created and deployed on our dev system as part of this sprint.

Sprint 78 (March 15, 2018 – March 28, 2018) has been completed. In this sprint, external value sets were included in the asserted value set index as well as updates to the search extension for the remote API. The LexEVS service was updated to support asserted value set reads. A snapshot build was created and deployed on our dev system as part of this sprint.

Sprint 79 (March 29, 2018 – April 11, 2018) has been started and will be reported on next month.

We also provided continued product maintenance and deployment support across all sprints.

Please see the weekly meeting notes for details:

F. Status of Deliverables/Milestones Overview

We have created a project wiki site out on Confluence Wiki at:

- <https://wiki.nci.nih.gov/display/LexEVS/LexEVS+Project+16X237+Documents>

We have created a JIRA agile board for the LexEVS Development at:

- <https://tracker.nci.nih.gov/secure/RapidBoard.jspa?rapidView=374&view=planning.nodetail>

This table of contents breaks out into different areas to capture the weekly meeting notes, monthly technical status reports, an area for documentation and a summary. This site will evolve throughout the lifecycle of this project.
