Beta PMI Central Study ALS v1.0.1.0 Modification Details

The Beta PMI Central Study patch ALS v1.0.1.0 includes changes relevant to the Practice environment. Custom Functions (CFs) were modified to remove '(T)' from Subject ID in the Payload for Practice mode and include 'practice' in the payload to redirect transactions to the practice environment in MATCHBox for Screening Protocol forms 'PMI CDISC Off Study Standard Form' and 'PMI CDISC Consent Withdrawal Standard Form', and Treatment Protocol Forms 'PMI CDISC Off Treatment Standard Form' and 'PMI CDISC Consent Withdrawal Standard Form'.

Below steps can be followed to deploy the Beta PMI_Central_Study_ALS_v1.0.1.0:

1. In Architect on your Rave URL instance, create a new CRF Draft under the PMI Central Study by uploading Beta_PMI_Central_Study_ALS_v1.0.1.0.
2. If any group specific changes were made to Beta_PMI_Central_Study_ALS_v1.0, update the new CRF DRAFT for Beta_PMI_Central_Study_ALS_v1.0.1.0 to include group specific changes.
3. Overwrite the existing Beta CRF version for Beta_PMI_Central_Study_ALS_v1.0 with Beta_PMI_Central_Study_ALS_v1.0.1.0.

The following CFs were modified in the Beta PMI Central Study ALS v1.0.1.0:

1. PMI_UTIL_InvokeWSViaRaveAPI –
   - Modified CF to remove '(T)' from Subject ID in the Payload for Practice mode.

2. PMI-CONSENT_MakeRequestJSON –
   - Modified CF to include 'practice' in the payload (e.g., "metadata":{"mode":"practice"}).
   - Modified CF to remove '(T)' from Subject ID in the Payload for Practice mode.

3. PMI-OFFSTDY_MakeRequestJSON -
   - Modified CF to include 'practice' in the payload (e.g., "metadata":{"mode":"practice"}).

4. PMI-OFFTX_MakeRequestJSON -
   - Modified CF to include 'practice' in the payload (e.g., "metadata":{"mode":"practice"}).
   - Modified CF to remove '(T)' from Subject ID in the Payload for Practice mode.

5. PMI-CONSENT_doProcessEC –
   - Log updates. No code changes.

6. PMI-OFFTX_doProcessEC
   - Log updates. No code changes.
