

LexEVS Server administration

[Installing LexEVS Grid Services](#) > [LexEVS back end installation instructions](#) > [LexEVS 5.x Administration Guide](#) > [LexEVS Model/DB \(back end\) administration](#) > [LexEVS Server administration](#)

Introduction

This document is a section of the [Administration Guide](#).

Configuration Options

See [Server configuration properties](#) in the Installation Guide.

System Monitoring and Logging

This section describes the configuration and use of LexEVS logs for system monitoring and debugging. The LexEVS service uses a set of log files. The log files are stored based on the LexEVS lbconfig.props file settings. Refer to Modifying the lgconfig.props file for LexEVS on page 23 of the *LexEVS 5.0 Installation Guide* for additional detail regarding the configuration parameters.

To view the LexEVS service and load log files perform the following steps.

Step	Action
1	Change directory to LexEVS administration directory based on the settings of the <code>lbconfig.props log_file_location</code> setting.
2	Open <code>LexBIG_full_log.txt</code> using text editor to review details about LexEVS service. 
	Open <code>LexBIG_load_log.txt</code> using text editor to review details about vocabulary load utilities. 

In addition to the log information, system properties are included as part of the system verification test as html or xml format. A sample of the system properties in html is included in Figure 5.
