LexEVS Discussion Topics		
Topic	Discussion Points	Action Items
<ul style="list-style-type: none"> URI Resolver (Linda, Tracy) 	<ul style="list-style-type: none"> Now working with set SQL import. Can create in memory db. Do you also want to be able to change the data? How do you want to manage the accounts to do so? The intent is to map identifiers to URI's. Preferably an official one. We need a mechanism for this process. We do have a local front end on local server. Not secure. 	<ul style="list-style-type: none"> Mayo to provide instructions on how to get new data into the db. To back up this effort with a script or use the existing GUI on load server.
<ul style="list-style-type: none"> Loading of resolved value set - JIRA 548 - (Tracy, Kevin, Pradip) 	<ul style="list-style-type: none"> RemoveScheme.sh is not working for removal of resolved value set schemes. Need clarity on the use of coding schemes for resolved value sets. How are the entities are linked back to the source coding scheme? How do you find out which version of the terminology the code comes from. Currently users select from a collection of value sets and search all value sets for a given entity. Need to provide a way to link terminology? We store the version of the coding scheme came from. Just two calls. 	<ul style="list-style-type: none"> See item 571. Remove script to be updated by Mayo. Mayo to look into providing a convenience method for resolving value sets from a resolved concept reference.
<ul style="list-style-type: none"> Value set resolution performance (Mandy, Kevin) 	<ul style="list-style-type: none"> Potentially resolved by the ResolvedValueSet implementation. Not really address, now pre- 	<ul style="list-style-type: none"> Agree to move to next weeks agenda. Tracy to download script. Scott,

LexEVS Meeting Agenda

	resolving.	Pradip and Kevin to provide support.
<ul style="list-style-type: none"> Tier deployment 	<ul style="list-style-type: none"> Based on the value set resolution performance discussion, we feel we could start tier deployment the second week in July. REST is nearly done. Still working on deployment. 	<ul style="list-style-type: none"> To deploy the rest of the CTS2 modules today.
<ul style="list-style-type: none"> Review JIRA items 	<ul style="list-style-type: none"> 571, 570 	<ul style="list-style-type: none"> We will start on 571, 570.
<ul style="list-style-type: none"> Search question (Kim) 	<ul style="list-style-type: none"> Need to know which tokenizer we are using. How we are handling the stop words. 	<ul style="list-style-type: none"> Some are posted to JIRA. Kevin to check and adjust as necessary. Look into having exact match work.
<ul style="list-style-type: none"> Release notes and tagging for QA 	<ul style="list-style-type: none"> How will this be handled 	<ul style="list-style-type: none"> Need deployment doc and ticket (references deploy doc.) Mayo to start work on these soon. Tracy to send a link to Kevin for the previous versions.
<ul style="list-style-type: none"> 	<ul style="list-style-type: none"> 	<ul style="list-style-type: none">
Adjourn	Thanks for your participation!
