Tool Overview

The [CDE \(Common Data Element\) Browser](#) is the primary starting point for exploring the contents of the cancer Data Standards Repository (caDSR). CDE Browser supports searching for, downloading, and sharing of CDEs within or across contexts. You can also share CDEs with [caDSR Form Builder](#) to build and edit forms.

Search Options

CDE Browser search options include

- [Data Element Search](#) finds CDEs via scope options and a keyword search across certain caDSR database fields.
 - For a more targeted search, [additional search criteria](#) are available for caDSR database fields.
- [Public ID Search](#) finds CDEs via one or more public IDs and a keyword search across certain caDSR database fields.

Search Tree

[Search Tree](#) enables you to click through and display content by caDSR context (set up by NCI and NIH divisions and program areas) and classification schemes within those contexts. You can also use the Search Tree to display filtered results and then [copy the URL](#) into a document, web page, or new browser window to display those results.

Working with Form Builder

You can save a customized set of CDEs to the [CDE Cart](#) in CDE Browser and share the cart with [Form Builder](#) (as long as you have the same login credentials for both applications). You can then use Form Builder to access the saved CDEs or retrieve them during another session to create case report forms. Items placed in the CDE Cart are a copy and not automatically updated if the caDSR CDE or form changes. If an item changes, you must place the item in the Cart again for it to be updated.

Unable to render {include} The included page could not be found.

Access

caDSR Supported Browser

If there is problem with caDSR, ensure that you are using Mozilla Firefox before contacting Application Support (NCIAppSupport@mail.nih.gov).

The [CDE Browser](#) is publicly accessible through an internet browser. For more information, see the [CDE Browser 5.3.5 Release Notes](#).

Commonly Requested Downloads

The caDSR team also packages the most commonly requested sets of CDEs for download, including [CDE Browser DTDs](#). We **strongly** recommend reviewing the pre-configured CDE downloads by clicking [Available Downloads](#) at the top of the CDE Browser page.

FAQs, Forum, and Support

Getting Support

If you need assistance, contact the [CBIIT Application Support Team](#):

- Email: NCIAppSupport@nih.gov
- Telephone: 240-276-5541

Documentation and Training

The following courses are available to learn more about CDE Browser.

- [1000 Introduction to Semantic Data course](#)
- [1020 Using the CDE Browser course](#)

The following documentation is available for the current release.

- [CDE Browser Release Notes](#)
- [CDE Browser FAQ](#)
- [CDE Browser User Guide](#)
- [caDSR Documentation](#)

Note: For an archive of CDE Browser documentation, see the [CDE Browser archive](#).

Related Tools

The following tools work with CDE Browser to manage your CDEs and forms.

- [caDSR Object Cart](#)
- [caDSR Form Builder](#)

See [caDSR Database and Tools](#) for a complete list of caDSR tools.
