

# NIH CDE Workshop September 30, 2015

Currently planned for September 30th, 2015, NIH is sponsoring a workshop for discussion of CDEs across NIH.

## Goals of the workshop

- Convene the NIH community interested in Common Data Elements (CDEs) to support NIH-wide understanding of current CDE activities and opportunities.
- Identify current barriers/challenges for the adoption and use of CDEs by NIH-funded researchers, both intramural and extramural.
- Identify possible ways to modify development, implementation, and use of CDEs to increase adoption and value to research.
- Identify incentives and opportunities for involvement of relevant communities in CDE development, harmonization, use, and re-use.
- Develop evaluation plans for CDEs to test their assumed utility.

The workshop will feature CDE related Birds-of-a-Feature (BOF) sessions on topics including CDE reuse and harmonization, Big Data challenge, interoperability, operationalizing CDEs, and infrastructure and tooling. The on-site participation will be NIH ICs only, however the day includes two public sessions via webCast: the morning presentations and the late afternoon BOF report-outs and discussion.

Agenda to be published soon!

Check back, or click "watch" this page for more information about the workshop.

## Workshop Organizers:

NIH OD: [Unknown User \(bournepe\)](#) [Jennie Larkin](#) [Leslie Derr](#)

NLM: [Betsy Humphreys](#) [Jerry Sheehan](#) [Michael Huerta](#) [Lisa Lang](#)

NCI CBIIT: [Unknown User \(kibbewa2\)](#) [Unkn](#)  
[own User \(decorons\)](#) [Unknown User \(reevesd\)](#) [Denise Warzel](#)

NCATS: [Elaine Collier](#)

- [Goals of the workshop](#)
- [BMIC](#)
- [Pre-workshop Webinar](#)
- [Pre-Workshop Materials](#)

## BMIC

The Trans-NIH BioMedical Informatics Coordinating Committee (BMIC) was established in the Spring of 2007 to improve communication and coordination of issues related to clinical- and bio-informatics at NIH.

- [BMIC home page](#)
  - [NIH CDE Collections](#)
  - [NIH CDE Tools and Resources](#)

## Pre-workshop Webinar

**NIH Common Data Element (CDE) Initiatives** - conducted Tuesday September 8, 2015, 12-1:30

### [Webcast recording and meeting slides](#)

- Introduction by the ADDS - Phil Bourne
- Overview of BMIC CDE efforts - Mike Huerta
- Notes from the field – voices across NIH involved in CDEs and data standards. Multiple uses of CDEs.
  - PROMIS CDEs - Ashley Wilder Smith
  - NIH PhenX Overview - Erin Ramos, followed by NHLBI Sickle Cell Disease CDEs Ellen Werner
  - NCI CDE overview - Dianne Reeves
  - NINDS CDEs - Joanne Odenkirchen, followed by Federal Interagency Traumatic Brain Injury Research (FITBIR) BRICS informatics system - Matt McAuliffe

## Pre-Workshop Materials

- [NIDA Clinical Trials Network Common Data Elements \(CDE\)](#) - Udi Ghitza, NIDA
- [NCI caDSR Infrastructure Wiki](#) and [NCI Hosted Data Standards](#) - Denise Warzel and Dianne Reeves, NCI CBIIT Semantic Infrastructure, caDSR Program
