

GAI Retirement

GAI Retirement Notice

The NCI CBIIT instance of the Genetic Annotation Initiative (GAI) portal was retired after 12 years in February 2013 and is no longer supported. The GAI was focused on building a catalog of annotated genes associated with cancer. Other currently maintained sites that have similar datatypes include:

[The Cancer Genome Atlas \(TCGA\)](#)

[The Mitelman Database of Chromosome Aberrations and Gene Fusions in Cancer](#)

[The Cancer Gene Census](#)

[Catalogue Of Somatic Mutations In Cancer \(COSMIC\)](#)
