Keeping Up With caNanoLab

For information about this caNanoLab release:

- [What's New with caNanoLab?](#)
- Access the [caNanoLab User Forum](#) to stay connected and provide feedback.
- See the [release note](#) for technical information.

At a Glance Details

- Version Number and Release Date: 2.3.3 January 25, 2018
- Primary audience: Investigators and researchers interested in information about the characterizations of nanomaterials used in biomedical research
- Installation Level: Intermediate - technical assistance may be required, download may require supporting infrastructure or software
- System Requirements: This is a web-based application that can be accessed through an industry standard browser. Installation requires:
 - Memory 1GB or more (Linux, Solaris, or Windows)
 - Disk storage 36 GB (minimum)
 - Database Server: MySQL v 5.5.x
 - JBoss Wildfly, 8
 - Java 1.8

Tool Overview

Welcome to the cancer Nanotechnology Laboratory ([caNanoLab](#)). caNanoLab is a data sharing portal that supports the international biomedical nanotechnology research community to expedite and validate the use of nanotechnology in biomedicine. caNanoLab provides support to annotate nanomaterials with characterizations resulting from physico-chemical, *in vitro*, and *in vivo* assays and share characterizations and associated nanotechnology protocols in a secure environment.

caNanoLab provides access to information on:

- Nanotechnology protocols in biomedicine
- Composition of nanomaterials
- Functions of nanomaterials (for example, therapeutic, targeting, diagnostic imaging)
- Physico-chemical characterizations including size, molecular weight, shape, physical state, surface chemistry, purity, solubility, and relaxivity

- In Vitro characterizations such as cytotoxicity, blood contact properties, oxidative stress, and immune cell functions
- Publications and reports from nanotechnology studies in biomedicine

caNanoLab was developed as a collaboration between the [NCI Center for Biomedical Informatics and Information Technology \(CBIIT\)](#), the [NCI Nanotechnology Characterization Laboratory \(NCL\)](#), and the [NCI Office of Cancer Nanotechnology Research \(OCNR\)](#).

Data Curation

Data curation is a key component for ensuring that data is appropriately annotated to facilitate data sharing in a semantically interoperable fashion. Data curation activities on caNanoLab are currently performed by the NCI Alliance for Nanotechnology in Cancer Data Coordinators and the NCI data curator. Data curators assist in extracting data from publications and nanotechnology experiments, annotating extracted data, and providing overall data quality control. If you are interested in submitting your data into caNanoLab, please contact [Application Support](#).

Installation and Downloads

Downloads for caNanoLab are available as listed below. The [caNanoLab Software License](#) applies. There is also a [caNanoLab GitHub Repository](#)

Note: Files for previous caNanoLab releases are available from the [caNanoLab files archive](#).

caNanoLab 2.3.3 Artifacts

- [cananolab-2.3.3-it3.zip](#)
- [caNanoLab 2.3.3 Release Note](#)

caNanoLab 2.3.2 Artifacts

- [cananolab-2.3.2-it-1.zip](#)
- [caNanoLab 2.3.2 Release Note](#)

caNanoLab 2.3 Artifacts

- [cananolab-2.3.1-it-05.zip](#)
- [caNanoLab 2.3 Release Note](#)
- [caNanoLab 2.3 Installation Guide](#)

Forum and Support

- [caNanoLab User Forum](#) - Forum for recommending caNanoLab enhancements
- [Application Support](#)
- [Nanotechnology Working Group](#)
 - [Coordinator: Mervi Heiskanen](#)
 - [Nanotechnology Working Group](#)

Presentations, Demos and Other Materials

The [caNanoLab Data Submission Video](#) and [accompanying transcript](#) is available to assist people in submitting data in caNanoLab.

Note: Materials for previous caNanoLab releases are available from the [caNanoLab Presentations, Demos and Other Materials archive](#).

Documentation and Training

To access online help in the application, click the **Help** button.

- [caNanoLab User's Guide](#)
