September 2016

## Release 2.7 features

This release of the NCI Metathesaurus (NCIm) Browser migrates to the new LexEVS 6.4 API along with a few minor updates and bug fixes.

Features include:

[NCIM-224](#) - Migrate to LexEVS 6.4

[NCIM-223](#) - Replace NCI\_MetaThesaurus by NCI Metathesaurus in hyperlinks.

[NCIM-225](#) - Suppress properties with at least one property qualifier STYLE=AUI, or STYLE=RUI.

[NCIM-230](#) - Updates to UI per the new NCI branding guidelines

## Bugs Fixed Since Last Release

[NCIM-221](#) - Unable to search on codes with colons

[NCIM-227](#) - NSC code hyperlink is broken.

## Known issues

**Hierarchy:**

[NCIM-106](#) - View in Hierarchy shows more than 5 parent levels above the concept.

[NCIM-107](#) - MSH Hierarchy nodes reporting incorrectly

[NCIM-111](#) - Wrong hyperlink for Hugo (HGNC) Concepts

[NCIM-116](#) - Changing the Source in the Simple Search box will change the viewed source in the concept details.

[NCIM-194](#) - Contains is not the default search once User select other filters for searching

This is a caching issue within a user's browser. This issue can be fixed by a user setting their internet browser to clear the cache upon startup of the browser.

The help page currently lists that the 2.7 release of the Metathesaurus Browser is running LexEVS 6.3 when actually it is running on LexEVS 6.4.1.2.

## CORE Product Dependencies

This product (internally) relies on LexEVS 6.3 APIs for access to NCI Metathesaurus data. Refer to [LexEVS 6.4.1.2](#) for details.
