

EVS GForge and Jira Projects

Contents of this Page

- [Current Projects](#)
- [Completed or Deprecated Projects](#)

CBIIT is in the process of migrating all projects from GForge to Atlassian Confluence/JIRA. Projects that were once in GForge and are now in Confluence/JIRA will have both the deprecated GForge URL and the new URLs listed. Projects created in Confluence/JIRA will have only those URLs listed. Projects that have not yet been migrated will have only the GForge address.

Current Projects

These are current, active projects that are still being worked on and accepting suggestions and requests.

Project Name and Links for More Information where Applicable	GForge Archive Links	JIRA URL
Main EVS	Docs archive , Files archive	https://tracker.nci.nih.gov/browse/MAINEVS
