## Tool Overview

Unknown macro: {multi-excerpt}

The [BiomedGT Wiki](#) enables groups of domain experts to collaboratively develop and maintain terminologies and is used in development of the NCI Thesaurus. The BiomedGT Wiki is a specific instance of [LexWiki](#) and operates on a Semantic MediaWiki platform.

## Installation and Downloads

- The BiomedGT Wiki was a public web application.

## What's New

Release History for BiomedGT wiki:

- Beta 1 Patch - January 2009
- Beta 1 - December 2008
- Alpha 2 - June 2008
- Alpha 1 - January 2008

The alpha version of the BiomedGT Wiki was moved to an NCI server for the Alpha 2 release in June 2008. Seven development iterations have been completed since then. Much of the work since June, 2008, has been related to supporting the CTCAE 4 update project (Common Terminology Criteria for Adverse Events). Refer to [BiomedGT Beta 1 Patch Release](#) for more information.

- The BiomedGT terminology (since removed from the LexEVS servers) was updated to version 08.11a (November 2008 data) in March 2009.
- NPO (Nanoparticle Ontology) was added to "Terminologies" in March 2009. (Version: December 9, 2008 asserted)
- CTCAE\_SOC is locked for editing. Public review was finished April 10, 2009. Edits are being processed. A final CTCAE4 will be published by June 1, 2009. Minor edits will continue to occur until CTCAE4 goes into effect in fall 2009.
- A RadLex 2.1 draft was posted in April 2009. (Comments on usability of the hierarchy structure are welcome.)

The following additional changes have been planned:

- CRCH (a nutrition subset of NCI Thesaurus) has not been actively used and is expected to be removed from the BiomedGT wiki in spring 2009. It can be added back if users request it.
- CTCAE Subject Terms, a pre-coordinated version of CTCAE 3, extracted from NCI Thesaurus, will be removed before fall 2009.
