Use of LexEVS caGrid Services on EVS Servers

The next sections describe the following services, which are in the process of being retired:
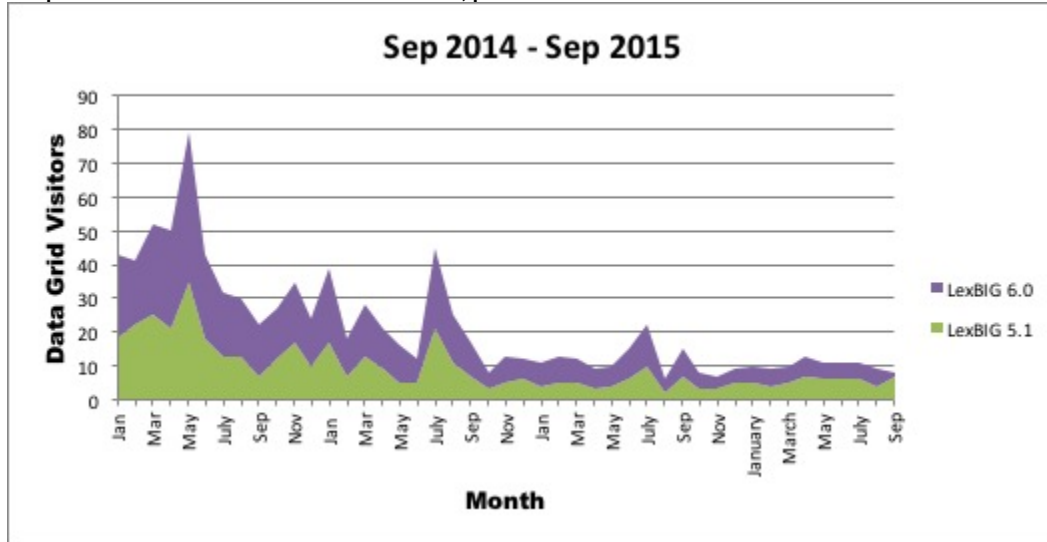

- LexEVS caGrid Data Services
- LexEVS caGrid Analytical Services

In addition to the Java API, EVS made available LexEVS Data and Analytical Services on caGrid. These services are close to final retirement and being shut down, so this section is mostly of historical interest.
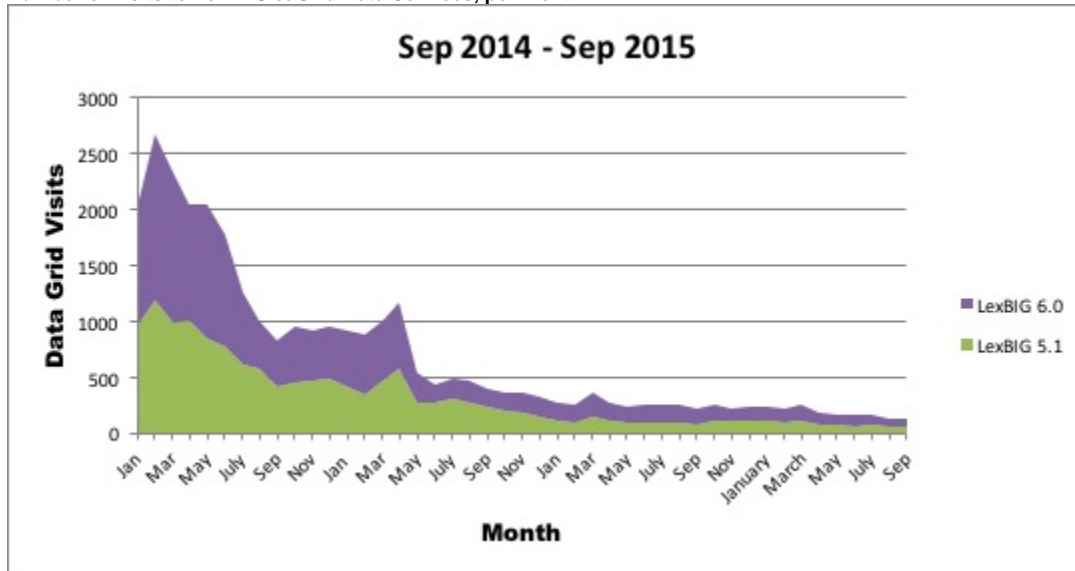

LexEVS caGrid Data Services

LexEVS Data Services on caGrid allow users to use CQL queries to obtain SOAP-based LexGrid XML results.

LexEVS caGrid Analytical Services

EVS also makes available LexEVS Analytical Services through caGrid, supporting method calls with a variety of parameters and returned LexEVS objects. This shows a similar pattern to the data services, with the retirement of 5.0 showing a drop in activity on the graph, but the 5.1 and 6.0 services remain steady.
