

Adjusting a Page URL to be Human-Readable

When you view your wiki page, if the URL address at the top of the browser window is in the following format, you can adjust the page so that the URL is human-readable:

```
https://wiki.nci.nih.gov/pages/viewpage.action?pageId=123456789
```

An example of a human-readable wiki page URL is as follows:

```
https://wiki.nci.nih.gov/display/space/User+Guide
```

To make your URL human-readable:

1. Open the page for editing as described in [Editing a Page](#).
2. In the page title, remove special characters.
3. When you are done editing the page, click **Save**.

For details, refer to [CONFSERVER-11285](#).
