

LexEVS 6.0 Fix Releases to Include

If you already have LexEVS 6.0 installed, fixes are now available:

6.0.4 [Notes](#)

Contains a list of the fixes and functions included in this release.

6.0.4 [lbRuntime.jar](#)

If you have started with the LexEVS 6.0.4 Installer GUI then you do not need to use this file. It is already there. If you have [LexEVS 6.0](#) or a later version [installed](#) then you can upgrade to 6.0.4. Download this file and overwrite a file by the same name in the {LEXEVS_HOME}/runtime directory. 6.0.4 contains all previous patch releases as well. There is no need to install them first.
