## Important Remaining Issues / Limitations

- Value Domain (CTS 2 Value Set) support in the 5.1 release is not fully implemented and is offered as a capability that developers of LexEVS dependent applications and services can use to familiarize themselves with value domains in a non-production setting. Production use of Value Domain functionality should be delayed until the release of the 6.0 build of LexEVS.
- [LexBIGServiceConvenienceMethods](#) in the 5.1 release are not all adapted for use in distributed mode and should not be attempted to be used distributed. These include [getHierarchyOrphanedConcepts\(\)](#), [getHierarchyLevelNextCount\(\)](#), [getHierarchyLevelPrevCount\(\)](#), [addEntityLuceneIndexes\(\)](#), [removeEntityLuceneIndexes\(\)](#), [modifyEntityLuceneIndexes\(\)](#).
