Team: LexEVS

Contract: CBITT BOA Subcontract# 29XS223

Client: NCI CBIIT

National Institutes of Heath

US Department of Health and Human Services

Revision History

Version	Date	Description of Changes	Author
1.0	5/14/10	Initial Version Approved via Design Review	Team

The **purpose of this document** is to describe the technical environment within which the product (e.g. HW, OS, Middleware) is to be developed, the external dependencies, the procedures to be used for the development (e.g. lifecycle model, CM) and a detailed schedule for the development.

Implementation Requirements

Please view the Implementation Requirements (included in Design Doc): LexEVS 6.0 Design Document - Implementation Requirements

Implementation Schedule

Please view the detailed schedule (project plan) on the LexEVS GForge docs archive page (6.0 Management).
