Init5pm22 - Integration of multiple terminologies

Pre Interview:

Item	Information/Response
Date:	12/18/2009
Requirement # unique id *<SemCon Ops Initiative>.<analysts initials><requirement number>* e.g. Init1dbw1 (eventually linked to Use Cases)	Init5pm22
Originator/Customer's Name:	Hannes Niedner - forum post
Originator/Customer's Company:	San Diego Supercomputer Center
Summary of requirement pre-interview, by Reviewer:	Currently the NCI standard source for terminology is exclusively NCI Thesaurus. However, EVS has other terminologies available and will be accessing even more in the future. A mechanism needs to be developed to deal with overlap of terms from multiple sources. The caveat being that the same term in different sources may or may not be identical in meaning. This will aid Information Modelers, Metadata Curators, and Terminologists.
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room	Use Caste Diagram
