

caArray 057 - caArray deployed in Eclipse - exception when caArray tested

Question: I deployed caArray in Eclipse but got an exception when I tested caArray. Why?

Topic: caArray Installation and Upgrade

Release: Up to caArray 2.x

Date entered: 04/14/2010

Details about the Question

I deployed caArray in Eclipse and tried to test the program. When I clicked on the "Manage array design", I got exceptions. The first part of the exceptions was like these:

```
java.lang.IllegalArgumentException: Category is null

```

Answer

This type of the exception could be caused by an empty caArray schema. The user should verify if the caArray schema has been setup properly by:

1. Opening the caArray database to see if the tables have been installed.
2. Querying a known caArray table in MySQL Client:

```
SELECT * FROM category
```

If the schema is indeed empty, it can be reinstalled via the steps below:

1. Shut down the caArray JBoss server.
2. Run the following ant command from the software/build folder:

```
ant database:reinitialize
```

3. Restart caArray JBoss
