The **purpose of this document** is to collect, analyze, and define high-level needs and features of the National Cancer Institute Center for Biomedical Informatics and Information Technology (NCI CBIIT) caCORE EVS Release 4.3. This document focuses on the functionalities proposed by the product stakeholders and target users in order to make it a better product. The use-case and supplementary specifications document will detail how the framework will fulfill these needs.

Vision and Needs

The **objective of this release** of the LexEVS 4.2.1 is to deliver any critical bug fixes and be used to deprecate EVS 4.0 support and give notice to users of the pending deprecation of the 3.2 API and EVS 4.1. We will also look into piloting the BDA process.

Current Solution

LexEVS 4.2

Proposed Solutions

Maintain 4.2 code base but deprecate EVS 4.0.

Functional Requirements

Each enhancement, modification or new feature is described in detail below.

GForge number (hyperlinked)	Brief description of functional requirement (enhancement or new feature)	Iteration (Approved or Proposed)
17198	Pilot BDA process	—
17199	Tag the API classes as deprecated	—
17670	DAO is throwing a ClassCastException when attempting access MedDRA	—

Functional Bug Fixes

Each bug fix included in this release is described in detail below.

GForge number (hyperlinked)	Brief description of bug	Iteration (Approved or Proposed)
—	TBD - critical fixes only	—

Non-Functional Requirements

This section describes in detail all the related requirements which must be met for this release but do not add functionality. These requirements are included in the scope and project plan due to level of effort or relative importance to the overall success of delivery of the release.

GForge number (hyperlinked)	Brief description of non-functional requirement	Iteration (Approved or Proposed)

Product Dependencies

This release is dependent on the caCORE components or products documented in the [Legacy caDSR Technology Dependency Matrix](#).

[caCORE:Provide additional explanation as applicable. For example, "The EVS vocabulary systems are used by the Java client to retrieve and validate concept information for naming and defining meanings."]

Out of Scope Items

Items that are out of scope were evaluated as part of the initial scoping activities for this release, and subsequently not included in the final approved scope. These items are also documented in the cumulative backlog of requirements found on the product GForge site. They include out-of-scope functional requirements (enhancements or new features), bug fixes, non-functional requirements, and general support activities.

GForge number (hyperlinked)	Brief description of item moved from the in-scope section with brief explanation added of why it was not included in this release	Iteration during which the item was removed from in-scope
