The **purpose of this document** is to collect, analyze, and define high-level needs and features of the National Cancer Institute Center for Biomedical Informatics and Information Technology (NCI CBIIT) Protégé Release 1.3.0.1. This document focuses on the functionalities proposed by the product stakeholders and target users in order to make it a better product. The use-case and supplementary specifications document will detail how the framework will fulfill these needs.

Vision and Needs

The **objective of this release** of Protégé 1.4.1.1 is to provide critical bug fixes that are necessary to maintain acceptable performance levels given the increased level of batch jobs observed in Protege 1.4.1.0.

This release will address the bugs described below found in UAT testing.

Functional Requirements

Each enhancement, modification or new feature is described in detail below.

GForge number (hyperlinked)	Brief description of functional requirement (enhancement or new feature)	Iteration (Approved or Proposed)
—	—	—

Functional Bug Fixes

Each bug fix included in this release is described in detail below.

GForge number (hyperlinked)	Brief description of bug	Status (Approved or Proposed)
23517	ChAO is slow working with over 57000 changes	Approved

26154	Performance does not seem to be as robust as it was in UAT	Approved
26131	NIH user name is displayed in <Definition_Reviewer_Name> slot of DEFINITION	Approved

Non-Functional Requirements

This section describes in detail all the related requirements which must be met for this release but do not add functionality. These requirements are included in the scope and project plan due to level of effort or relative importance to the overall success of delivery of the release.

GForge number (hyperlinked)	Brief description of non-functional requirement	Iteration (Approved or Proposed)
—	Example, "Although there are no functional changes to the product for this requirement, the team must migrate the existing software to Hibernate 4.1 to be compatible with the caCORE technology stack."	—

General Support Activities

This section describes in detail all the related activities which must be performed for this release but do not add functionality. These activities are included in the scope and project plan due to level of effort or relative importance to the overall success of delivery of the release.

GForge number (hyperlinked)	Brief description of general support activity	Iteration (Approved or Proposed)
—	Example, "Level 2 Support, integration of help and training to the user community."	—

Stakeholder Summary

Customer Name	Role	Interest/Need
EVS Content Editors	Edit NCI Thesaurus and BiomedGT Content	Primary Users of Protege

CBIIT Staff/Contractor Name	Role	Responsibilities
Frank Hartel	EVS Product Manager	---
Gilberto Fragoso	Government Lead	---
Sherri De Coronado	Contract Project Officer	---

Technical Environment

This product uses the following technical components which have been derived from the current [NCICB Technology Stack](#).

Component	Description
Client Interface	<ul style="list-style-type: none"> Example, Internet Explorer 6.0 and above Example, Mozilla v. 1.5.0.3 and above
Application Server	Example, Apache Tomcat 5.5.9
Database Server	Example, Oracle 9i
Operating System	<ul style="list-style-type: none"> Example, Windows 2000, XP, Vista Example, Unix (Sun Solaris)
[EVS:Other]	—

Product Dependencies

This release is dependent on the caCORE components or products documented in the [CORE Product Dependency Matrix](#).

[EVS:Provide additional explanation as applicable. For example, "The EVS vocabulary systems are used by the Java client to retrieve and validate concept information for naming and defining meanings."]

Out of Scope Items

Items that are out of scope were evaluated as part of the initial scoping activities for this release, and subsequently not included in the final approved scope. These items are also documented in the cumulative backlog of requirements found on the product GForge site. They include out-of-scope functional requirements (enhancements or new features), bug fixes, non-functional requirements, and general support activities.

GForge number (hyperlinked)	Brief description of item moved from the in-scope section with brief explanation added of why it was not included in this release	Iteration during which the item was removed from in-scope
