90	Scott	Investigate as to whether CTS2 is spec-ed for use of code system namespace for code query				open
100	Scott	Check into source code, namespace application for code queries, javadoc availability etc				open

Progress

Loader Evaluation status (Joanne, Tracy)	MedDRA, Joanne's evaluation and or new error report. Some problems are corrected. Codes are active. SMQ's are properly attached to presentation. Tracy to load 16.1 in the RRF loader. Joanne to recheck after and will ask Stephanie Lipow to comment further. Some improvements in the loader. Active equals n – Different from RRF. By request CUI's are being loaded as well. Presentations are being loaded as t1 and t2. Scott to follow up on possible names being loaded. Obsoletes presentations are not being loaded AD and OL codes. Scott to check in this. SMQ's are confusing – the properties of the SMQ's are not showing up on the term. History data is not understandable to the user. Joanne or Stephanie to email Scott with details.
6.1 QA and Deployment (Tin, Jason)	We are on stage for 6.1. CTS2 and URI resolver on peer review. Test plan for Tin to show Preston for purposes of moving up a stage.
Thesaurus load time (Tracy)	Follow up on MySQL configuration. Did apply changes – will try a new source load when the next iteration of the Thesaurus comes through.
Face to Face plans (Craig)	Deferred till next week.
Widget progress (Scott)	Update
Deployment Options page (Scott)	No one was assigned to follow up on this last week. Checking in to see if we need further evaluation. Gilberto to follow up.
Meta Loader problem	JIRA Item #596. Scott to investigate whether the resumebatch will pick up the thread in question. Temporary table also not always being cleaned up.
Reset on OWL2 Uri Situation	Check JIRA item #338, new reference is #595
Multiple Namespace report	CTS2 rest call has no namespace. Multiple namespaces exist for some sets of codes. We need a JIRA item for this. Need a CTS2 query with a namespace param for cts2. Scott to investigate in spec and add feature request if this is possible.
Return a REST call with a given tree of associations.	Not currently implemented in CTS2. We will be attempting to create this with JavaScript when we make the tree. Could provide the java method and REST access to that method. JIRA item to be created by Tracy.

Questions re: newer spring implementations	Issue handled on email thread.
Tree extension	No code namespace available to adjust query here either. Scott To follow up.
