Progress

6.1 QA and Deployment (Tin, Jason, Scott)	Status: Proposed we install index on stage. Could do as a onetime workaround. Should wait for Stage move to Production. Will wait till the current data set is moved up. Common Index is large and unwieldy. IRA Item to be created. (Tracy) Tracy and Scott to work out some requirements for testing indexes on Stage.		
Meta Loader Error Output	JIRA Item #596.		
6.1 Documentation	Status. Report on entry points etc. Noted the Links that are release related have not been updated. We will switch to the 6.1 in symbolic link to LexEVS landing point.		
JIRA Item for Value Set convenience method	JIRA #590 Currently we need to pass coding scheme to server to return the property to find out if it's a value set. None are tagged as Production.		
Forums and user support (Gilberto and Sherry)			
Code coverage reports and QA JUnit documentation (Tracy)			
DataQA inclusion in PTE's
