LexEVS 6.0.4 Release Notes – unsupported version

Patch release requires user to replace lbRuntime.jar.

- This release contains an RXNORM loader which is a community contributed (PGRN PHONT) project. As such, it is unsupported.
- Contains updated launchers for Value Set GUI for 64bit Windows and Linux.
- Set DB_PRIMARY_KEY_STRATEGY=SEQUENTIAL_INTEGER as default for generating primary keys in the database. https://tracker.nci.nih.gov/browse/LEXEVS-494
- Corrected an issue with the RRF loader that failed when loading ICD-10.
- Modified the UmlsRootNodeResolver to only mark codes that have V-SAB value as being root nodes.
- Updated build for OSX to allow GUI to work with newer versions. (Not backward compatible with powerpc Macs.)
- Updated loader descriptions to better match function. https://tracker.nci.nih.gov/browse/LEXEVS-454
- Updated build dependencies to point to NCI Nexus server.
