Progress

Immediate Priorities (Scott)	Mechanism of Action Value set. This is breaking in the CTS2 Service only. The browser seems to not be properly showing this either. Scott to check the database.		
Face To Face Followup	Clarify CDISC Requirements for the SPARQL endpoints. URI Resolver proposal. Action Items and Summaries. MySQL version update noted as an issue.		
6.1 Deployment	Status: Firewall exception has been denied, based on two new vulnerabilities for 6.1 and one more for 5.1. This will be fixed over the week end by Jacob.		

Resolved Value Sets from different Coding Scheme versions (Kim)	Scott to talk to Harold about the Resolved Value Set versioning issue. Notably they are allowed to use previous value set versions. Will need to keep previous versions of value sets for CDISC.		
JIRA or GitHub for forum (Jason)	Preston talked about using GitHub rather than JIRA. Julie Klem suggested hubzero. Waiting for a decision about switching masters from NCIP to lexevs.		
PDQ and Value Sets	Value Set Name is being truncated. Issue 594 needs to be a high priority. Suggest use of formal name. Scott to fix by the end of the week.		
Confirming distributed backward compatibilities	Need to confirm that 6.0 can talk to 6.1 in distributed mode.
