caArray 066 - Installation for caArray installation or upgrade failed - finding the error log

Question: The installation for caArray installation or upgrade failed. Where can I find the error log?

Topic: caArray Installation and Upgrade

Release: caArray 2.X

Date entered: 07/27/2010

Answer

Two JBoss servers that make up caArray, and the JBoss server optionally installed for UPT, run continually as services.

- JBoss 4.0.5 for UPT (optional)
- JBoss 4.0.4 (for caArray Grid services)
- JBoss 4.0.5 (for caArray application)

The daily activity for each server is recorded in the server.log file, located in $JBOSS_HOME\server\default\log directory. The previous day's log files are automatically archived and renamed as: server.log.YYYY-MM-DD, stored under the same directory.
