Progress

Immediate Priorities and Problems (Mayo Team)	Scott: MySQL 5.5 update - pre-CTS2 API authoring functionality causing locks - LexEVS 6.0 CTS2 API - 5.5 has a metadata lock on tables (update and create) - The API uses - iBatis XML (for querying, etc) - DDL - script implementation (drop and create tables) - currently used within LexEVS and the pre-CTS2 API. - The problem is when you create a code system and drop the code system (using the CTS2 API) - Scott needs to talk with Kevin to hope to get some insight on the DAO. - This is not part of the distributed API. - Options: - Fix the locking use and continue to include CTS2 java API in 6.2. - Remove CTS2 Java API from 6.2 (no fix required) - Scott will continue to look at issue with Kevin to confirm this limited to the CTS2 Java API. Cory: CTS2 Client UI, Java 1.7 - Java 1.7 - Compiled in 1.7 and running Junits - Determining what are issues and what are simply timing issues. - Plan to run on Mayo Dev system - full integration testing. - Client UI - Version of IE - 11 Craig: Project Plan Updates - Added Struts Jira Item - Added OWL Loader Items. - Jason to create DRT for DEV request. Scott to provide details to Jason.		
caDSR and Value Set and other URIs (Weekly Status)	- Denise and Sherri to get a demo set up in June – Harold to be included. - Tracy sent a list of sort extensions to caDSR. - Tracy sent note to Kevin about how "match to query" was implemented. - If we can send Tracy the section of code, she can send that onto caDSR.		
ARC	- No updates.		

Value Set Viewer Item prioritization	Jira #21 (⚠ [LEXEVSCTS2-21](#) - Jira project doesn't exist or you don't have permission to view it.) - currently limits the use of the value set CTS2 1.1 based service. Need to determine if it needs to be fixed in LexEVS or only in CTS2 service. TODO: Scott This limitation should be noted on current release notes: TODO: Scott ⚠ [LEXEVS-594](#) - Jira project doesn't exist or you don't have permission to view it. has been resolved. Needs to be verified and marked as resolved.		
Value Set Resolution issue CTS2 JIRA #21	See above.
