## Progress

Immediate Priorities and Problems (Mayo Team)	<p>Scott: Loader testing against, MetaBrowser Update, PTE, 598</p> <ul style="list-style-type: none"> <li>• Scott spent some time looking at the tree builders - not updated in LexEVS and in Java, etc. Scott updated so that we can easily run units and have been migrated to GitHub LexEVS channel. At some point will want to get them part of some anthill process.</li> <li>• PTEs created for Jacob in order to do deployments on DEV/QA. Once ready, Scott will be able to start deployments - possibly do deployments manually.</li> <li>• Get entire tree 597#</li> </ul> <p>Cory: Working JIRA #'s 371, 599</p> <ul style="list-style-type: none"> <li>• Updating the services to be able to return active/all concepts.</li> <li>• Created a junit to be able to demonstrate this ability and found that restriction isn't being passed.</li> <li>• Currently, in the CTS2 spec, there is ability to query for Active and ALL, but not inactive only concepts.</li> <li>• Log issue with OMG. (TODO)</li> </ul> <p>Craig: Project Plan Updates, NLM Demo Meeting, September F2F, Contract update, Lucene</p> <ul style="list-style-type: none"> <li>• Plan updated to remove 2 JIRA items.</li> <li>• NLM Demo meeting scheduled for September</li> <li>• Working on Cost Estimate for recent 12 month (and follow on 12 months) extension.</li> <li>• Working to complete the Lucene Project Plan estimate</li> <li>• F2F planning - consider to have this during the AMIA meeting in November.</li> </ul>		
caDSR and Value Set and other URIs (Weekly Status)	Scott determined that the URI resolver is case sensitive, but Kevin believes it is not. So further evaluation is needed in the future.		
Dev DRT request	<p>No timeline identified - but Jacob and team will continue to work on the 2 PTEs.</p> <p>Scott will need to wait for those PTEs to be completed.</p>		
Discussion of JIRA #597	<p>Email discussion during the past week.</p> <p>Include email excerpt here (TODO)</p> <p>Need JIRA items to track both discussion points - 597 and a new item.</p> <p>Usecases could be captured on the wiki and then be able to link them to the JIRA items.</p> <p>CTRP would like to have a REST call to be used for their curation process. Might be good to share CTS2 specification with this group for them to review. Larry and Gilberto to determine best time to discuss with this team.</p> <p>This activity would be captured during the 6.3 design and architecture phase.</p>		
Agile discussion	<p>Discuss in context of contract.</p> <p>Still waiting on green light for the official policies.</p> <p>Mayo team possibly attending Mayo provided Agile training.</p>		
Preferences File - Synonyms (Tracy/Scott)	Need to have synonyms to be identified during the load. Currently coming across as properties.		
LexGrid XML publishing (5.1)	<p>LexEVS 6.X doesn't export (long export time).</p> <p>There may be a closed JIRA item - Scott worked on this previously). Need to find so we can see what was done.</p> <p>Include this in the announcement of 5.1 retirement.</p> <p>No need to maintain unless there is a need (based on feedback from the announcement).</p>
