Progress

Immediate Priorities and Problems (Mayo Team)	<p>Scott: DEV deployment, OWL</p> <ul style="list-style-type: none"> Focused on deployment on DEV - build verifications on files (all moved to DEV) Need MySQL Password (Scott to get from Tracy) Mayo hardware configured to use SSD. Working on putting indexes on this drive. Some OWL loader/issues have been commented on by Scott and would like the team to review and comment. <p>Cory: Working JIRA #'s 371, 599</p> <ul style="list-style-type: none"> Running/verified on local system. Going to deploy and test before marking complete. Will start 599. <p>Craig: Project Plan Updates, Contract updates.</p> <ul style="list-style-type: none"> Updated plan to have Scott work on the DEV deployment and OWL. Contract - identified travel plans and will submit with cost proposal. This included Lucene/SOLR conference. 		
caDSR and Value Set and other URIs (Weekly Status)	Tracy - no updates.		
Dev DRT request	Continuing DEV deployment. Scott will report as things progress.		
Agile discussion	Still waiting on NCI policy. Mayo team to take Agile class in September.		
Preferences File - Synonyms (Tracy /Scott)	Preferences file did work correctly for Tracy.		
LexGrid XML publishing (5.1)	<p>It was planned last week to identify the retirement of this in the 5.1 retirement announcement to see if there are any existing users.</p> <p>No further work needs to be done until decision is made about retirement.</p>		
QA Process	<p>Scott discussed the monolithic junit tests and now to reduce failures (caused mostly by timing issues). Would like to be able to simplify and refactor some of the tests.</p> <p>Given the minimal amount of time needed to do the refactoring (1 day) - and the gains that can be made for QA, we will have Scott attempt to simplify and refactor the tests.</p> <p>Per, Tin, there will be a QA tier and Dev tier (original plan was to have a compressed DEV/QA). (Scott will need to update the PTEs) – This will need to be clarified.</p>
