Init1pm5 - Data rollback functionality

Pre Interview:

Item	Information/Response
Date:	12/17/2009
Requirement # unique id <semcon initiative="" ops="">.<analysts initials=""><requirement number=""> e.g. Init1dbw1 (eventually linked to Use Cases)</requirement></analysts></semcon>	Init1pm5
Originator/Customer's Name:	Ashwin Mathur : forum posting
Originator/Customer's Company:	Unknown
Stakeholder Community: Enter appropriate category of stakeholder from Primary Stakeholders: Software and Application designers and architects Software and Application engineers and developers Scientific and medical researchers Medical research protocol designers Clinical and scientific research data and metadata managers Clinicians Patients Medical research study participants Broader Stakeholders: caBIG® Community WS NIH projects and related commercial COTS vendors (caEHR, SDO's (HL7, CDISC); International Collaborators (e.g NCRI, cancerGrid, China), Government and regulatory bodies (FDA, CDC, ONC) (link to view SemConOps Stakeholders description).	 Clinical and scientific research data and metadata managers Software and Application engineers and developers
Summary of requirement pre-interview, by Reviewer:	There should be a way to cleanly remove any model that has been loaded. This is important for Software Engineers that would be managing their own metadata (e.g. model loads), as well as for Metadata Curators to rollback model loads. If using the current technology stack, there will need to be a robust algorithm for this since not all data might be able to be rolled back. Note: this is linked to Init1pm6 - Automate Loading process
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room	Use Case Model
