# Init1hm2 - NCI level vocabulary services for Diseases and Interventions

## Pre Interview:

| Item | Information/Response |
|---|---|
| **Date**: | 12/28/2009 |
| **Requirement # unique id** *<SemCon Ops Initiative>. <analysts initials><requirement number>* e.g. Init1dbw1 (eventually linked to Use Cases) | Init1hm2 |
| **Originator/Customer's Name**: | Christo Andonyadis |
| **Originator/Customer's Company**: | NCI |
| **Summary of requirement pre-interview, by Reviewer:** | A model owner (Actor) from CTRP needs to annotate his model. He need to create a CDE (e.g., NCI CTRP Disease) with a list of enumerate values by reference. EVS should provide the services that allow the model owner to search for a term (e.g., disease) and return all descendants of this term at once (hierarchical search). |
| **Recommended Next Step** Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room | use case development |
