

Init1SD6-Standardized annotations of UML associations names-concepts

Pre Interview:

Item	Information/Response
Date:	01/07/2010
Requirement # unique id <SemCon Ops Initiative>.<analysts initials><requirement number> e.g. Init1dbw1 (eventually linked to Use Cases)	Init1SD6
Originator/Customer's Name:	Brian Davis/Forum post
Originator/Customer's Company:	3rd Millenium
Summary of requirement pre-interview, by Reviewer:	The Primary actor is a cancer researcher. The business goal is to move a step closer to realization of semantic web. The associations between various UML classes need to be as unambiguous as possible this would make traversing classes a more informed affair. The best way to achieve this would be to enable associations to be annotated with concept codes.
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room	Use case development
