The **purpose of this document** is to collect, analyze, and define high-level needs and features of the National Cancer Institute Center for Biomedical Informatics and Information Technology (NCI CBIIT) Protégé Release 1.4.3. This document focuses on the functionalities proposed by the product stakeholders and target users in order to make it a better product. The use-case and supplementary specifications document will detail how the framework will fulfill these needs.

Vision and Needs

The **objective of this release** of Protégé 1.4.3 is to provide bugs fixes found in 1.4.2 Protégé release but was not considered a showstopper for the 1.4.2 release.

Current Solution

Protégé 1.4.2 is currently in production.

Bug Fixes

GForge number (hyperlinked)	Brief description of item	(Approved or Proposed)
29752	Generate Reports shows undesirable internal values	Approved
29753	Extra box character shows in generated report	Approved
29758	Duplicate restrictions are found in the class BRCA1_wt_Allele.	Approved
29770	Concept History Plugin - OLD_PARENT is deleted during save of concept history	Approved
29923	Unable to search from box by hitting return key	Approved
29517	When invalid format is provided on a clone it doesn't retain previously entered Definition	Approved
30038	Change of Semantic_Type value after changing PTs	Approved
30082	Explanation Server Does Not Properly Startup for NPO Vocabulary	Approved
30111	Modeler can't create workflow tasks	Approved

General Support Activities

This section describes in detail all the related activities which must be performed for this release but do not add functionality. These activities are included in the scope and project plan due to level of effort or relative importance to the overall success of delivery of the release.

GForge number (hyperlinked)	Brief description of general support activity	Iteration (Approved or Proposed)
—	Example, "Level 2 Support, integration of help and training to the user community."	—

Stakeholder Summary

Customer Name	Role	Interest/Need
NCI CBIIT EVS Content Editorial Team	EVS Content Management	Primary Users of Protégé. Utilize Protégé to edit EVS content
—	—	—

CBIIT Staff /Contractor Name	Role	Responsibilities
George Komatsoulis	NCI CBIIT	Oversees NCI CBIIT Application Infrastructure
Avinash Shanbhag	Director of CORE Engineering	Oversees NCICB caCORE Software Engineering
Sherri de Coronado	Contract Project Officer	Management/technical resource from Bioinformatics vertical. Contract management, coordination, testing, documentation
Gilberto Fragoso	Government Lead	Technical resource from Bioinformatics vertical

Technical Environment

This product uses the following technical components which have been derived from the current [NCICB Technology Stack](#).

Component	Description
Client Application	The Protégé client is java based and provides a complete editing environment for Protégé databases, call ontologies. It uses the same plugin architecture to support extensions, called Tabs. For example, the NCI Edit Tab, Workflow, Changes, and Prompt, are examples of plugin tabs. Java 1.5.x
Application Server	None
Database Server	MySQL
Operating System	Any that supports Java: Windows XP, Linux, OS X
[caCORE: Other]	Portable ANSI-SQL compliant relational schemas

Product Dependencies

This release is dependent on the caCORE components or products documented in the [CORE Product Dependency Matrix](#).

[Provide additional explanation as applicable. For example, "The EVS vocabulary systems are used by the Java client to retrieve and validate concept information for naming and defining meanings."]

Out of Scope Items

Items that are out of scope were evaluated as part of the initial scoping activities for this release, and subsequently not included in the final approved scope. These items are also documented in the cumulative backlog of requirements found on the product GForge site. They include out-of-scope functional requirements (enhancements or new features), bug fixes, non-functional requirements, and general support activities.

GForge number (hyperlinked)	Brief description of item moved from the in-scope section with brief explanation added of why it was not included in this release	Iteration during which the item was removed from in- scope
30038	Change of Semantic_Type value after changing PTs	—
30305	When cloning, not escaping definition if invalid class name	—
30338	If only 2 N&S restriction and one is removed through merge of filler values - shows as defined	—
30352	Changing Concept Name in namespace and refreshing causes blank preferred name	—
30375	After resolving referencing class in PreRetire, does not refresh referencing classes list	—
30376	If rename class_name two classes, can never PreMerge them	—
30378	Null pointer if rename namespace while class is loaded in Merge tab	—
