Tool Overview

The Biospecimen Research Database (BRD) is a free and publicly accessible database that contains peer-reviewed literature pertinent to the field of human biospecimen science. The database is updated periodically with both recent and historical publications and may serve as a vehicle for literature review, evaluation of "in use" biospecimen handling protocols, development of new protocols, and identification of analytes that are susceptible or impervious to handling variability.

Meetings

Weekly Meeting

Mondays, 10 a.m. - 11 a.m. Eastern

Conference Call Info: **855-462-5367** passcode: 72431415#
