The **purpose of this document** is to document the security plan for the National Cancer Institute Center for Biomedical Informatics and Information Technology (NCI CBIIT) **LexEVS Release 6.3**.

## Information Systems Security Plan

### A list of the industry standard security controls expected in this product

- [HTTPS](#)  REST security (if needed)
  - Possible uses:
    - URI Resolver administration
    - CTS2 Development Framework administration
    - LexEVS REST secure ontology access/token transfer
- [RFC 2196](#) 
  - Specifically, section [3.1.2 Separation of Services](#) 
    - This architecture will allow services to be separated to those needing to be exposed externally and those that do not.
    - Services NOT to expose externally:
      - URI Resolver administration
      - CTS2 Development Framework administration

### The components of the CBIIT technologies used for security controls

None

### Any expected deviation from the standards

None
