Progress

Scott	Sprint 6
Cory	Sprint 6
Craig	- Sprint 6 - Agile Admin

Agenda

Sprint Status	Current Sprint - Sprint 6 (June 3, 2015 - June 24, 2015) LexEVS S13-500 Agile Development - Sprint Status#SprintStatus-Sprint6
Sprint Planning	Issue Grooming • Prioritize JIRA issues **key summary type created reporter priority status labels** ⚠ Jira project doesn't exist or you don't have permission to view it. View these issues in Jira The following issues are the highest priority and, if possible, be put in the current or next sprint. • LexEVS-942 Need to determine a path to fix this. This is the highest priority one as of now. • LexEVS-970 This was a use case that was missed in the original development work. This needs to be fixed as well.
Prototype Discussion • Prototype complete	Need to make a decision on what version of Lucene to use after Scott does some additional research.
MRMAP Loader • Update from Rob (grepping the subset mappings)	⚠ LEXEVS-942 - Jira project doesn't exist or you don't have permission to view it. J JIRA item is updated with the results. DB timeout was increased from 8 to 24 hours and it still timed out.
6.3 Status • Update from Tin	Note from Larry that they are going from QA to Stage. It may be on production in the next week or two.
Lucene Version Update - 5.1 • Luke support • Prototype working with 5.1 • 5.2 released on June 7 ○ 5.2 Features	Lucene release 5.2 has been released. We agreed that we will evaluate 5.2 to see if it works for the prototype. We also will need to determine if Luke will work with 5.2. At some point, we need to select a version and go with it.

Mayo as trusted site also VPN	Gilberto is waiting for some verification on what we can do
• Update from Jason	Remote apps will not allow you to run GUIs.
Terminology Updates on Dev and QA	Other interested parties agreed that QA should be updated with the latest terminology.
• Larry to discuss	The open question is what should should be on DEV (i.e. current production data) and others?
	Gilberto suggest the following:
	• Software DEV - data is stable • Data DEV - software is stable
	Larry suggested we can add different Databases to DEV, if needed.
	Tracy/Rob to lead this effort and work with systems.
External Request	We agreed that we should set up a virtual meeting/demo.
• epSOS request discussion	Larry will look into setting up a meeting with them to discuss/demo.
