Multi-Index Prototype Status	Prototype is complete and have results to review.					
<ul> <li>Results (Scott)</li> </ul>	Times shown are better for many areas.					
	For multi-index searching, results were slightly higher, but still < 100 ms.					
	Two questions from NCI came up:         • Will the performance hold up when we use real data.         • When we go to a multi user environment and multi queries, will the performance hold up?					
Local XSD Resolution	LEXEVS-1029 was worked on to put in a temporary fix.					
<ul> <li>Resolution and Priority (Scott)</li> </ul>	NCI has suggested to just point at a local copy of the XSDs being that they don't change often.					
	We should complete this issue in 6.4.					
6.3 Deployment Status	CTS2 framework 1.2.0.FINAL on Informatics maven and build works against this.					
<ul> <li>NCI Maven Mirror Update (Cory)</li> </ul>	NCI's Nexus server is no longer blocking the Mayo Nexus Proxy after a restart.					
	The goal is for NCI to be able to build lexevs CTS2 service. Mayo will put the correct CTS2 framework 1.2.0.RC1 artifacts on mayen to allow NCI to mirror and build.					
OBI Load	lexevs-service has be successfully deployed / tested on QA. The OWL1 source was successfully loaded with OWL2 loader.					
<ul> <li>Update and next</li> </ul>	Scott to send the output from the load to NCI to review the hierarchy.					
steps (Scott)	Possibly note that the content that is too long has a truncated marker on it.					
	May need to fix the inverse properties. Inner classes (inverse properties) are not being parsed.					

CTS2 Doc Service - NodeJS/NPM versions • NCI Tech Stack (Gilberto)	The NCI infrastructure group will not support Redis. If we add Redis, NCI will need to support the entire server upgrade/maintenance. MongoDB will be supported. Redis will not be supported. Our CTS2 service API docs can run without Redis when we upgrade to the latest Node.js and NPM. Gilberto will follow up if Node.js and NPM will be supported.
VPN and network evaluation <ul> <li>Update from Gilberto and Jason</li> </ul>	No updates from Mark. Jason will follow up with him.
