Working with Coding Schemes	<p>When dropping a coding scheme, validate that the index is removed and make sure we test that the metadata.xml file is updated accordingly as well.</p> <p>When updating an index, make sure that the metadata.xml be updated correctly.</p> <p>Administration of loading metadata in the GUI is cumbersome.</p> <p>The last loaded value set is at top (or bottom) of the list and hard to find (page through) - in GUI and CLI. Resolved VS and Mappings are loaded as coding schemes.</p> <p>They would like a list of just coding schemes, or resolved value sets, or mappings. This type could be captured in the index.</p>
Sprint Demos	It was suggested that if there was test code to deploy or demos to show at the end of the sprint, we should do that during this weekly meeting.
