Known Issues and Workarounds

- [CANANOLAB-61](#) - Multiple points of contacts issue.
 - **Workaround:** When submitting a different address for the same organization, users should change the name of the organization (e.g. include division or department name in the organization name).
- [CANANOLAB-71](#) - New option "Sample Name/contains" is not working correctly for some queries.
 - **Workaround:** User can use "Sample Name/equals" option.
- [CANANOLAB-81](#) - Results tab is populated when curator/admin submits batch job to create data availability matrix and disappears if curator /admin log out and login again even the job is still running.
- [CANANOLAB-84](#) - Advanced search returns the same result if use "AND" or "OR" option with Sample criteria + Composition criteria.
 - **Workaround:** User can perform two searches instead of using "OR" option.
- [CANANOLAB-85](#) - Back button on Curation/Review Data Pending Release to Public/Edit does not work properly. This issue can be seen by curators only.
- [CANANOLAB-197](#) - The system is unable to reset the user access control section on the submit publication form when user click on the reset button (only happens for some IE9 configurations).
- [CANANOLAB-238](#) - IE Only - System unable to display uploaded file name (IE9 only).
- [CANANOLAB-367](#) - User unable to sort protocol search results with protocol type and protocol name column header.
- [CANANOLAB-368](#) - User needs to select link twice to view external PubMed content via the DOI external url (or open the link in new window with the right click mouse option).
