[2015.12 Technical Face-To-Face Prioritization List](#)

We clarified the priorities for each piece of work to be done. There is now a column to indicate what work will be done during the 6.4 timeframe.

Next steps - We will create JIRA issues for each work item in the list.

CTRP will get back to the EVS group when they have firm requirements. It was suggested that Craig/Larry will follow up with Jose in about a month to see if we can assist them and understand their requirements.

Tracy brought up the "Path to Root issue" - This is part of the existing transitive closure issue captured in the F2F notes. If this was developed in CTS2 it would be to retrieve descendants and ancestors. We should also consider how this will work if there are multiple different paths to root. For example, the thesaurus has many nodes that have 10+ paths to root. Sherri will send an example of this to the development team.

Tracy mentioned that "Lung Carcinoma" has several different paths to root.

Examples from Sherri of concepts with many paths to root.

- Colon Serrated Adenocarcinoma
- Colorectal Neuroendocrine Tumor G2
- Intracranial Cavernous Hemangioma
- Localized Non-Resectable Adult Hepatocellular Carcinoma

Other general comments were that the 3 day duration was a good time frame and it was also good to meet with other teams (CTRP and Systems).
