Agenda

LexEVS External Users

Sprint Status	**Current Sprint** - Sprint 36 (August 04, 2016 – August 20, 2016) LexEVS S13-500 Agile Development - Sprint Status#SprintStatus-Sprint36
QA Tier Status - Test update - Tin - AppScan	Discussion Points: - There were some indexing issues that have been fixed. - Tin is testing CTS2 today. - When testing is complete, Tin will request an AppScan. This should be in the next few days Decision Points: - Tin to request an AppScan when testing is complete.
LexEVS using HTTPs - Update - Configuration and test on NCI DEV - Lexevs Remote API - Lexevs Service (CTS2)	Discussion Points: - HTTPS updates have gone smoothly. We have everything working in our local dev environments. - We are working with NCI to get everything configured for HTTPS on the NCI DEV environment. - We are still configuring CTS2 on DEV with Jacob to get this up and running. Decision Points: - Scott will submit a ticket to create a Mayo DEV environment at NCI. - Larry suggested that we document how this will affect the end users. - Remote API Users - CTS2 Rest Users
CTS2 Testcase update	Discussion Points: - This was a Java 8 issue. Deepak has committed a fix for it. ⚠️ LEXEVSCTS2-39 - Jira project doesn't exist or you don't have permission to view it. - All other LexEVS tests have passed our system tests. Decision Points:
HL7 Content Load Issue	Discussion Points: - This is an issue for failing MetaThesaurus indexing around an HL73 large term - This will be a loader fix. Decision Points: - The decision was made to truncate to the max size. - Since this is a simple fix, we agreed to add this issue to the current sprint to fix. - We should output an error to the console when we encounter this and add a keyword to search on.

6.5 Planning	Discussion Points: • Mayo team has been grooming the backlog. • We don't need to migrate to Spring 4. • The task to remove caCore should be in the 6.5 release. • The CI server issues may not need to be fixed when we support 6.4 and above as they will be obsolete. • Tracy suggested upgrading the Lexevs build to maven. Decision Points: • Scott requested that the team review the backlog and let us know if there is anything that has high priority. • Larry suggested that the tech stack upgrade (java 8, CentOS 7) may be the next release relatively soon.
OWL2 Loader verification	Discussion Points: • No testing has been done yet. Decision Points:
LexEVS External Users	No issues.
Update on ⚠ **LEXEVS-1516** - Jira project doesn't exist or you don't have permission to view it.	Discussion Points: • Kim has a workaround for this. Decision Points: • Kim will determine if his work around is sufficient or if we need a fix for this issue.
Team Absences	Mayo Team • Deepak - Sept 1-6?, Sept 5 • Cory - August 12, Sept 5 • Scott - August 15, Sept 5 • Craig - August 24 -29, Sept 5
