Sprint Status	**Current Sprint** - Sprint 38 (September 1, 2016 – September 14, 2016) [LexEVS S13-500 Agile Development - Sprint Status#SprintStatus-Sprint38](#)
6.4.1 Deployment/Testing status	Discussion Points: - lexevs-service 1.5.1 needs to be built and tested on QA. - There is a build artifact issue on anthill pro. It cannot find an artifact. - Mayo team is looking into this issue. Decision Points:
OWL2 Loader Discussion ⚠ [LEXEVS-2245](#) - Jira project doesn't exist or you don't have permission to view it. - Thesaurus/OWL2 Source	Discussion Points: - OWL2 loader fails loading the NCI Thesaurus. - There are 3 different issues uncovered. 2 of the 3 issues are resolved at this point. The last issue should be resolved this week. Decision Points:
NCI Nexus Server Migration Update	Discussion Points: - Sarah requested an SFTP site to allow for Mayo to send a copy of our Nexus repository (as jars) to them. - Once the jars are uploaded, Sarah will add them to the NCI Nexus repository. Decision Points:
LexEVS External Users Alexander	https://github.com/cts2/lexevs-service/issues/2#issuecomment-240205829 No new news.
REST CTS2 Discussion	Craig set the next meeting for
SSL and LexEVS 6.4	Discussion Points: 6.3 will continue to run in parallel with 6.4.1. 6.4.1 - Runs only on security level TLS v1.0. Any higher levels of TLS will cause LexEVS Remote API to fail. - HTTP requests will be forwarded to HTTPS - This is only for testing on DEV/QA. - Here are the specific rules for STAGE/PROD: - Apache is being used as a proxy, it will handle https for tomcat/lexevs. Both http & https are enabled now in the lower tiers for testing. In production, a client must connect using https, and if it attempts to use http it can be redirected to https; however, the client must be able to switch over to https on redirection. Decision Points: - HTTP requests will not be forwarded to HTTPS. This will be shut off. - Gilberto said this is how it will work at the end of year. - Only HTTPS will be supported. - Scott will email and confirm with Jacob that he is shutting off HTTP on QA.
LexEVS 6.4.1 Documentation	Discussion Points: - Larry suggested that the team should review the 6.4.1 wiki documentation. Decision Points: - Cory to complete the 6.4.1 documentation and send links out to changes for the team to review.

Team Absences	Mayo Team
	- Deepak - - Cory - Sept 8-9 - Scott - - Craig - Sept 8-9 NCI
