2016-09-14 Retrospective - 6.4 Phase Tier Deployment - Sprint 38

Date	15 Sep 2016
Participants	Unknown User (stanclcr2) Unknown User (endlecm), Scott Bauer, Unknown User (sharmad)

Retrospective

What did we do well?	What should we have done better?
- Pull request workflow - followed by the team. - When problems encountered, the team helped each other. - The team has maintained good humor even when things get stressful.	- Too much churn during pull request acceptance. - Pull requests happening late the the sprint. - Need to get better at gathering requirements from NCI. Alignment process of task priorities and short term goals to be improved.
