Agenda

Continue discussion around what is missing from current REST CTS2 service. (All)	 OWL2 considerations Statement BNode (not supported purely in CTS2) No canonical RDF Spec for CTS2 Modeling considerations (for example Neoplasm) Flattening of content necessary to represent in LexEVS There are things that were not able to be represented in LexEVS nor CTS2. Issues Restrictions bundled together in role groups Ability to represent conjunctions and disjunctions. within a given cancer, there are multiple prognosis - but will be flattened and nonsensical. Relationship between LexEVS and graph or RDF/SPARQL Support for partonomy GDC groups
Next Steps	 Schedule our next meeting to prioritize the above list Schedule focused discussions on each topic (follow on meetings).
